

# JOHNPAY VELA

## SOFTWARE DEVELOPER

---

### CONTACT

-  714-862-0366
  -  johnpaul.vela@eagles.cui.edu
  -  <https://jp-vela.github.io>
  -  [LinkedIn](#)
  -  San Juan Capistrano, CA
- 

### EDUCATION

- **BS IN COMPUTER SCIENCE**  
Concordia University Irvine  
- Graduation Dec 2025
- 

### LANGUAGES

- English
  - Spanish
  - Mandarin Chinese
- 

### COURSE WORK

- **CSC212** Data Structures and Algorithms
- **CSC316** Intro to Networking
- **CSC318** Object Oriented Programming
- **CSC322** Software Engineering

### SKILLS

**Programming** | Python - Java - C# - C - PHP - JavaScript - Shell Script

**Web** | HTML - CSS - MySQL - Node.js - TCP/IP - Google Cloud

**Frameworks** | Bootstrap - Keras - React - LangChain - NumPy - Pandas

**Tools** | Linux - Visual Studio - VS Code - Git - Arduino - Raspberry Pi

**Concepts** | Embedded Systems - Data Structures - Operating Systems - Machine Learning - Neural Networks

---

### EXPERIENCE

- **Home Automation - personal project**  
A Raspberry Pi and Arduino project to control my lights, window blinds, and security camera from a web app/voice control.
  - Developed using Python3 and NodeJS on Linux
  - Real-time audio sampling and processing
  - Motor and light control for blinds and lamps
  - Live video streaming to web front-end
  - Trained custom CNN for wake word detection using Keras
  - Trained custom LSTM for task classification using Keras
  - Used multithreading to run multiple jobs
- **YouTube Context - personal project**  
Using a pre-trained embedding model, a console-based tool to query a YouTube video and return a timestamp for the answer.
  - Developed using Python3, youtube\_transcript\_api, and the ChromaDB library to access the embedding model.
- **Panora - personal project**  
A web-based tool to store and preview research sources as well as keep notes.
  - Developed backend using Node.js
  - Currently using Heroku for hosting
  - Using Puppeteer to screenshot websites and send it to the client via a REST API.
  - Developed front-end using ReactJS and Bootstrap.
  - Transactions handled by Stripe
